

SonicWALL Vulnerability Scanning Service

SonicWALL Security Applications

SonicWALL Vulnerability Scanning Service is an automated, Web-based subscription service that provides easy-to-use, ongoing and comprehensive assessment of over 730 security threats by testing networks from the hacker's view. Scans can be scheduled on a regular basis or triggered on-demand to test changes in network infrastructure. Because of its comprehensive vulnerability list and flexible scanning and reporting options, SonicWALL Vulnerability Scanning Service delivers peace of mind for network administrators and managers.

SonicWALL Vulnerability Scanning Service reports on vulnerabilities in public servers, gateways and routers. This service examines a network perimeter for weaknesses on an ongoing basis and provides administrators with in-depth guidance on how to address the risks to eliminate opportunities for hackers. SonicWALL Vulnerability Scanning Service is easy to configure and run using SonicWALL's integrated, mysonicwall.com security portal.

SonicWALL Vulnerability Scanning Service enhances the comprehensive protection available to network administrators in an easy to manage, integrated security solution.

SonicWALL Vulnerability Scanning Service Features and Benefits

- **Complete Vulnerability Assessment.** SonicWALL Vulnerability Scanning Service checks for more than 730 types of vulnerabilities. The service detects operating system security "holes," DNS, HTTP, FTP, SMTP server vulnerabilities, network device vulnerabilities (routers, printers, bridges, switches, etc), TCP/IP port openings and more.
- **Instant Expertise.** SonicWALL Vulnerability Scanning Service provides expert remedies for fixing detected security vulnerabilities.
- **Flexible Reporting Options.** You can sort reports by risk level and other criteria to allow you to prioritize which vulnerabilities to address first.
- **Customizable Scheduling.** You can schedule security assessment scans periodically or on-demand.
- **State-of-the-Art Updates.** Security updates for SonicWALL Vulnerability Scanning Service security are backed by Network Associates Labs, the world leader in advanced security technology.
- **Simple to Administer.** SonicWALL Vulnerability Scanning Service is easy to use and integrated with SonicWALL Internet security appliances. It's a Web-based service so there is no software to install. You can easily schedule scans and configure the service to fit your needs from your own SonicWALL security portal at www.mysonicwall.com.
- **Assured Security.** SonicWALL Vulnerability Scanning Service delivers peace of mind for network administrators that their public servers are being checked for security vulnerabilities on an ongoing basis.
